

CAPRI

CAPRI 12 POINT

Capri is a constructed sans serif antiqua in the tradition of *Futura* and *Avant Garde*. The proportions of the letters and the overall impression are modern and contemporary but also retain the crude charm of the constructivist concept. The design is based on basic forms as square, circle and triangle and was developed by drawing not writing. That geometric background determines the character of the font and is accentuated in many features. The diagonal, as visible in the lower case letters e, g and y, is one of those attributes, forming the character. In the italic version the diagonal becomes even more significant. This details and the vertically cut endings of the curved strokes give the font its sharp-edged look and puristic elegance.

CAPRI 10 POINT

Different to most other traditional constructed sans serif typefaces the proportions of the letters drift away from the humanist ideal. Ascenders and descenders are very short in comparison to the x-height and the cap height is even shorter. The widths of the lower case letters as well as that of the upper case letters approximate and give a modern appearance to the font. The axis of the curves is vertical and the contrast in the strokes is low.

CAPRI 8 POINT

The font has a two-storey a and g to improve the recognizeability of the letters and the legibility of the typeface. It is primarily designed to be used as a headline font but short copy texts are also marvellously readable. Capri stands for the modern interpretation of classical elegance and is particularly suitable for advertising in the fashion or beauty business.
